¹Additional forms may be required for the following permits:

- If your project may qualify for Department of the Army authorization through a Regional General Permit (RGP), contact the U.S. Army Corps of Engineers for application information (206) 764-3495.
- If your project might affect species listed under the Endangered Species Act, you will need to fill out a Specific Project Information Form (SPIF) or prepare a Biological Evaluation. Forms can be found at <http://www.nws.usace.army.mil/Missions/CivilWorks/Regulatory/PermitGuidebook/EndangeredSpecies.aspx>.
- Not all cities and counties accept the JARPA for their local Shoreline permits. If you need a Shoreline permit, contact the appropriate city or county government to make sure they accept the JARPA.

<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Don't know
5l. Briefly describe the vegetation and habitat conditions on the property. [help]
<p>The topography of the site is generally flat with slight to steep slopes into the depression. The natural topography and habitat of the site was altered substantially by gravel mining activities. The closed undeveloped basin on the site is significantly lower in elevation than land to the east and south, and slightly lower in elevation than land to the west and north. Steep slopes located east and south of the site are remnant cut slopes left over from the former gravel mine. Hydrology features include a stormwater ditch, two stormwater swales and two stormwater outfall pipes. These currently contribute stormwater runoff from existing Pierce Transit operations into the undeveloped portion of the site.</p> <p>The 2016 site visit documented landfill debris along the edges and within the bottom of the depression of the site including concrete and broken pavement, asphalt, empty cans, rubber tires, and other miscellaneous metal, plastic, and clothing debris. Bird use was documented during the site visit and included multiple species of song birds. No mammals or amphibians were observed during the site visit. Vegetation at the site consisted of a mix of native and non-native plant species. Native species identified included: red alder (<i>Alnus rubra</i>), black cottonwood (<i>Populus balsamifera</i>), Douglas fir (<i>Pseudotsuga menziesii</i>), pacific madrone (<i>Arbutus menziesii</i>), Pacific willow (<i>Salix lasiandra</i>), sitka willow (<i>Salix sitchensis</i>), sword fern (<i>Polystichum munitum</i>), slough sedge (<i>Carex obnupta</i>), soft rush (<i>Juncus effusus</i>), creeping buttercup (<i>Ranunculus repens</i>) and common cattail (<i>Typha latifolia</i>). Invasive species identified during the site visit included: English ivy (<i>Hedera helix</i>), Himalayan blackberry (<i>Rubus armeniacus</i>), Japanese knotweed (<i>Polygonum cuspidatum</i>) and common tansey (<i>Tanacetum vulgare</i>).</p> <p>The location of the site, in a highly urbanized area, limits the amount of habitat functions the site provides as there is no buffer areas or large undisturbed vegetated corridors for wildlife use. In addition, due to homeless activity, garbage and stormwater, water quality of the site is likely impacted. Additional factors contributing to low habitat function and value of the site include the highly disturbed nature of the majority of the habitat, the urban nature of the surrounding land use and the lack of fish or significant wildlife populations in the project site. However, there are portions of the site that contain mature native trees and are more representative of native forest.</p>
5m. Describe how the property is currently used. [help]
<p>The South Base site is 11.5 acres, with 5 acres of employee/fleet parking and an administration/training building on the northern portion of the site. The southern 6.5 acres of the site is undeveloped and a historical remnant from a gravel mining operation owned by the City of Tacoma. The lower excavations of the abandoned gravel mine remain and have formed isolated wetland like features.</p>

5n. Describe how the adjacent properties are currently used. [\[help\]](#)

The site is located in an urban area and to the east and west are commercial buildings (shopping and vision clinics), to the north is the Pierce Transit fleet and employee parking area and to the south is 100th Street SW and single family homes.

5o. Describe the structures (above and below ground) on the property, including their purpose(s) and current condition. [\[help\]](#)

There are no above or below ground structures on the project site. However, there are multiple outfalls and culverts that discharge to the site.

5p. Provide driving directions from the closest highway to the project location, and attach a map. [\[help\]](#)

Directions to the South Base Facility: From I-5 South, use the right lane to take exit 127 for WA-512 East to Puyallup/S Tacoma Way. Use the right two lanes to turn right onto WA-512 (signs for S Tacoma Way). Use the right two lanes to turn right onto S. Tacoma Way (Signs for South Tacoma Way/ Lakewood). Turn left onto 96th Street SW. See attached Google Maps.

Part 6—Project Description

6a. Briefly summarize the overall project. You can provide more detail in 6b. [\[help\]](#)

Pierce Transit is planning to expand its facilities at its headquarters located in Lakewood, Washington. The South Base site is 11.5 acres, with 5 acres of employee/fleet parking and an administration/training building on the northern portion of the site. The southern 6.5 acres of the site is undeveloped and a historical remnant from a gravel mining operation owned by the City of Tacoma where the lower excavations of the abandoned gravel mine remain and have formed isolated wetland like features.

For this application, we are requesting a Jurisdictional Determination for the onsite wetland prior to the initiation of permitting for the project. The onsite wetland does not have a direct surface outlet and there are no direct connections to other surface waterbodies. We are requesting the U.S. Army Corps of Engineers (USACE) to review the information in this JARPA form and conduct a site investigation to determine if the wetlands are a water of the U.S.

6b. Describe the purpose of the project and why you want or need to perform it. [\[help\]](#)

Obtaining a jurisdictional determination of isolation will help Pierce Transit in the permitting aspects of the project.

6c. Indicate the project category. (Check all that apply) [\[help\]](#)

☒ Other: Jurisdictional Determination. No other project actions are proposed at this time.

6e. Describe how you plan to construct each project element checked in 6d. Include specific construction methods and equipment to be used. [\[help\]](#)

- Identify where each element will occur in relation to the nearest waterbody.
- Indicate which activities are within the 100-year floodplain.

Not Applicable: no actions are proposed at this time.

6f. What are the anticipated start and end dates for project construction? (Month/Year) [\[help\]](#)

- If the project will be constructed in phases or stages, use [JARPA Attachment D](#) to list the start and end dates of each phase or stage.

Start Date: Not Applicable End Date: Not Applicable ☐ See JARPA Attachment D

6g. Fair market value of the project, including materials, labor, machine rentals, etc. [\[help\]](#)

Not Applicable: this is for a Jurisdictional Determination

6h. Will any portion of the project receive federal funding? [\[help\]](#)

- If **yes**, list each agency providing funds.

7i. For all filling activities identified in 7h, describe the source and nature of the fill material, the amount in cubic yards that will be used, and how and where it will be placed into the wetland. [help]						
Not applicable: there are no grading or filling activities proposed.						
7j. For all excavating activities identified in 7h, describe the excavation method, type and amount of material in cubic yards you will remove, and where the material will be disposed. [help]						
Not applicable: there are no excavation activities proposed.						

Part 8—Waterbodies (other than wetlands): Impacts and Mitigation

In Part 8, “waterbodies” refers to non-wetland waterbodies. (See Part 7 for information related to wetlands.) [\[help\]](#)

☐ Check here if there are waterbodies on or adjacent to the project area. (If there are none, skip to Part 9.)

8a. Describe how the project is designed to avoid and minimize adverse impacts to the aquatic environment. [\[help\]](#)

☐ Not applicable

8b. Will your project impact a waterbody or the area around a waterbody? [\[help\]](#)

☐ Yes ☐ No

8c. Have you prepared a mitigation plan to compensate for the project’s adverse impacts to non-wetland waterbodies? [\[help\]](#)

- If Yes, submit the plan with the JARPA package and answer 8d.
- If No, or Not applicable, explain below why a mitigation plan should not be required.

☐ Yes ☐ No ☐ Don’t know

8d. Summarize what the mitigation plan is meant to accomplish. Describe how a watershed approach was used to design the plan.

- If you already completed 7g you do not need to restate your answer here. [\[help\]](#)

8e. Summarize impact(s) to each waterbody in the table below. [\[help\]](#)

Activity (clear, dredge, fill, pile drive, etc.)	Waterbody name ¹	Impact location ²	Duration of impact ³	Amount of material (cubic yards) to be placed in or removed from waterbody	Area (sq. ft. or linear ft.) of waterbody directly affected

¹ If no official name for the waterbody exists, create a unique name (such as “Stream 1”) The name should be consistent with other documents provided.

² Indicate whether the impact will occur in or adjacent to the waterbody. If adjacent, provide the distance between the impact and the waterbody and indicate whether the impact will occur within the 100-year flood plain.

³ Indicate the days, months or years the waterbody will be measurably impacted by the work. Enter “permanent” if applicable.

8f. For all activities identified in 8e, describe the source and nature of the fill material, amount (in cubic yards) you will use, and how and where it will be placed into the waterbody. [\[help\]](#)

8g. For all excavating or dredging activities identified in 8e, describe the method for excavating or dredging, type and amount of material you will remove, and where the material will be disposed. [\[help\]](#)

9i. Does the project site have known contaminated sediment? [\[help\]](#)

- **If Yes**, please describe below.

☐ Yes ☒ No

9j. If you know what the property was used for in the past, describe below. [\[help\]](#)

According to the 2005 JD Report (Found in the attached Letter Report Appendix A), the City of Tacoma acquired the site in 1939 for the purpose of active gravel mining and the site was actively mined until 1968 (GeoEngineers 2005). Evaluation of historical aerials found in the 2005 JD report, indicate the site was most likely a stormwater settling pond that was receiving a combination of facility stormwater and wash-water from mining operation. Written documentation also indicates that the City of Tacoma managed the site as an active landfill/dumpsite by issuing a solid waste permit to the Lakes Drywall Company (Permit #27-007). Much of this dumped material is still present and visible throughout the area as shown in site photographs taken during a November 2016 site visit and presented in Figure 2 of the attached letter report.

9k. Has a cultural resource (archaeological) survey been performed on the project area? [\[help\]](#)
