#3 IT'S ELECTRIC

CAN YOU FIND YOUR WAY THROUGH?

REDUCING OUR CARBON FOOTPRINT

Pierce Transit is a leader in providing clean, sustainable public transportation. Most of our buses run on compressed natural gas, an eco-friendly alternative to gasoline. However, we want to do even better. In alignment with our agency's commitment to sustainability, we're continuing to buy electric buses. In addition to helping replace diesel and gas buses, electric bus benefits include:

- Lowers maintenance costs
- Produces **zero** emissions
- Contains **30%** fewer parts
