Bus System Recovery Plan
Virtual Town Hall
September 2023

Thomas Wittmann, Principal, Nelson\Nygaard
Peter Soderberg, Senior Associate, Nelson\Nygaard
Darin Stavish, Principal Planner, Pierce Transit
**Zoom Tips**

- Everyone is muted by default.
- We will monitor the chat function.
- Click the “Interpretation” button below to listen to this presentation in Spanish.

**Let’s have a great meeting!**

- Submit questions using the “Q&A” feature.
- We will pause for questions after each topic.

*Presione el botón de “Interpretation” abajo para escuchar esta presentación en español.*
Why are we doing a Bus System Recovery Plan?

- COVID-19 changed when and how people travel
- Though pandemic-related mandates have been lifted, Pierce Transit has been unable to add back service due to lack of bus drivers and maintenance staff
- Pierce Transit is operating at about 80% pre-pandemic service levels
- A Bus System Recovery Plan provides the roadmap on how to build back service
The Bus System Recovery Plan Will…

• **Seek to understand how to bounce** back from the impacts of COVID-19

• **Capture public feedback** to help better understand the needs of the community

• **Recommend service options** that can help improve mobility for all residents, current riders, and future riders

• **Consider changes** in population, employment densities, and socio-economic factors
What data did we look at?

• Ridership and connections for every route
• Fall 2022 travel patterns – using phone data
• Population and employment data
• Socioeconomic data
• Future growth projections and plans
Outreach Effort Informed Improvement Priorities

- Stakeholder feedback
- Almost 750 responses from riders and nonriders
- More than 50 bus drivers' feedback

Here are the improvements you suggested:

1. Later evening/earlier morning service (65%)
2. Restore Saturday service (58%)
3. Restore previously reduced service (55%)
4. Improve timed transfers (52%)

- Peak frequency service (High ridership routes): 51%
- Align with sound transit stations: 50%
- Peak frequency service (Other routes): 46%
- Speed and reliability: 35%
- Infrastructure improvements on High ridership routes: 34%
- Midday frequency service (Other routes): 32%
- Midday frequency service (High ridership routes): 29%
- Expand Runner microtransit: 29%
Two Scenarios Designed to Rebuild to Pre-Pandemic Service Levels

- Bus driver and maintenance staff availability will determine how fast service is rebuilt - *Implementation will be phased*
- Scenarios highlight different strategies on frequency and how early / late service runs
- Almost all routes maintain their current travel pattern
- Both scenarios include new Pacific Ave / SR 7 Enhanced Bus service
Focus on Span of Service Scenario

- Routes 13, 63, 409, and 425 will change travel patterns
- Four frequent (every 15-minute) routes (1, 2, 3, 500)
- Restored timed transfers at Tacoma Mall when buses run less frequently
- Runner service replaces several fixed route buses
- Buses operate earlier and later, with minimum targets of:
  - Weekday: 6 a.m. – 10 p.m.
  - Saturday: 7 a.m. – 10 p.m.
  - Sunday: 8 a.m. – 8 p.m.

Focus on Weekday Frequency (Headways)

Scenario

- Routes 409 and 425 will change travel patterns
- Seven frequent (every 15-minute) routes (1, 2, 3, 41, 48, 54, and 500)
- Restored timed transfers at Tacoma Mall when buses run less frequently
- Runner replaces fixed route service in Puyallup
- Most routes to operate every 30 minutes
- The highest ridership routes would operate later seven days a week

We Want Your Feedback!

• Improvements will begin with Pacific Ave/SR 7 Enhanced Bus in March 2024
• Additional improvements will be added based on bus driver and maintenance staff availability
• We will use your feedback to help prioritize which improvements to implement
